    tools:context=".MainActivity"/>  
</RelativeLayout>
```

- i) Create a student login application and enable the interface between main activity, xml string and activity main.

```
package com.example.cuea;  
  
import android.support.v7.app.AppCompatActivity;  
  
import android.os.Bundle;  
  
public class MainActivity extends AppCompatActivity {  
  
    @Override  
  
    protected void onCreate(Bundle savedInstanceState){  
        super.onCreate(savedInstanceState);  
        setContentView(R.layout.activity_main);  
    }  
}
```

**(6 marks)**

- ii) Critique the following statements “match content is key dimension layout” **(4 marks)**

- Q2. a) Below is a simple android login module to authenticate usernames and their corresponding password.

```
<TextView  
    android:id="@+id/texto"  
    android:layout_width="wrap_content"  
    android:layout_height="wrap_content"  
    android:layout_alignLeft="@+id/listaVista"  
    android:layout_alignParentBottom="true"  
    android:layout_alignRight="@+id/listaVista"  
    android:text="firstname"/>  
    android:text="lastname"/>  
<ListView  
<ListView  
    android:id="@+id/listaVista"
```

- i) Explain the role of the elements used from above. **(4marks)**
- ii) Discuss a brief summary of software development in context of software development **(4 marks)**
- b) Define the following terms.  
i) DVM  
ii) Emulator  
iii) Toast draft  
iv) ANR **(8 marks)**
- c) Explain how data in android is integrated with cloud services. **(4 marks)**
- Q3. a) Describe the following terms;  
i) Implicit intent **(2 marks)**  
ii) Broadcast receiver **(2 marks)**  
iii) Service **(2 marks)**
- b) i) State FOUR key components of android architecture **(4 marks)**  
ii) Evaluate FOUR merits of android runtime environment. **(4 marks)**
- c) Discuss common dialog boxes that support in android. **(4 marks)**
- d) State the attributes of toggle button **(2 marks)**
- Q4. a) Explain the scope of intent filter of the coding used below. **(4marks)**

```
<intent-filter>  
<action android:name="android.intent.action.MAIN"/>  
<category android:name="android.intent.category.LAUNCHER"/>  
</intent-filter>
```

- ii) Define notifications? State and explain THREE notifications available in android giving each example. **(7 marks)**
- iii) The android students was evaluating container .Briefly state components available in android container. **(3 marks)**
- iv) Discuss major security issues facing mobile technology today. **(6 marks)**

Q5. a) use the android coding below;

```
Intent intent=new Intent(this,MyTestActivity.class);  
startActivity(intent);
```

- i) Evaluate the role of content used above. **(4 marks)**
- ii) A class was evaluate sub-activites. Describe how do you pass the data to sub-activities android? **(2 marks)**
- ii) Define application Widgets in android? Describe how it can be embedded in other applications. **(5 marks)**
- b) Android software is developed under different layers Describe Android application Architecture used **(5 marks)**
- c) Discuss FOUR common features of android software. **(4 marks)**

**\*END\***
